-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. Claims 44-64 are pending.

### *Election/Restrictions*

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

3. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 44-54 and 63-64, drawn to a cell line being able to produce a monoclonal antibody comprising a F<sub>ab</sub> fragment, the cell line being one of the cell line deposited under accession number LMBP 5108CB or a cell line producing a monoclonal antibody having a reactivity identical to that of a monoclonal antibody obtained from the cell line LMBP 5108CB antibody and a composition thereof.
- II. Claims 55-58, drawn to a method of treatment and/or prevention of a haemostasis disorder with a monoclonal antibody F<sub>ab</sub> fragment or a homologue.
- III. Claims 59-62, drawn to a polynucleotide encoding for an antigen-binding monoclonal antibody Fab fragment or a homologue thereof.

4. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I was found to have no special technical feature that defined the contribution over the prior art of Pareti et al (IDS reference, see entire document).

Pareti et al teach a monoclonal antibody, LJVP1, which is able to bind GPIb and inhibits the binding of vWF factor (see abstract and p.82, 2<sup>nd</sup> col., last ¶). The referenced antibody comprises a F<sub>ab</sub> fragment. The scope of the claim encompasses the referenced antibody because claim 44 recites "the cell line being one of the cell line". It is well known in the art that the monoclonal antibody is produced by hybridoma cell line.

Art Unit: 1644

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maher Haddad whose telephone number is (571) 272-0845. The examiner can normally be reached Monday through Friday from 7:30 am to 4:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841. The fax number for the organization where this application or proceeding is assigned is 703-872-9306.
